VINE TO GLASS

The natural choice

Nielsen data collected by the Beverage Media Group provides insight into the organic wine category, for example: *"While the wine industry has been busy riding the pink wine wave, it is becoming clear that the "green wine wave" is worth catching as well. Millennials' interest in organically grown wines is leading to double-digit growth in sales, say green wine industry experts. Although the sector is tiny now—it is **one of the fastest-growing segments in the U.S.**"*

Many wines that are "made from organic grapes" contain sulfites, processing additives and non-organic agricultural ingredients. In the case of **Vine to Glass**, our **V2G** red blend was grown and made on our French vineyards which have been certified organic since 1995. Through these efforts, we are proud to guarantee:

- ✓ No Pesticides
- ✓ No Preservatives
- ✓ No added Sulfites
- ✓ No Herbicides
- ✓ No GMO's
- ✓ USDA Organic Seal of Approval

✓ **Enjoy today, tomorrow or cellar for 2+ years**

V2G is a global project and we look forward to delivering our customers additional offerings through our **Vine to Glass** project.

Tasting Notes: From the cool, dry climate of the South of France comes **V2G**. With a deep, intense violet color, it is a complex wine with aromas of ripe plums and spice notes. A fresh, incredibly clean wine with great character and a very approachable palate feel.
